

# MC35™

## Commercial Leave-in Cleaner.

A commercial water treatment management game-changer!

- Mild flocculant cleaner containing MC1+ inhibitor
  - safer for older systems
- Does not need to be drained from system, saving time and money

ADEY's MC35 is designed to lift ALL types of solids from the system. A magnetic and non-magnetic filtration device must be installed on the system prior to dosing MC35 to capture all loose debris.

! CMX MUST be installed prior to dosing MC35 to capture all loosened debris from system.

! MC1+ MUST be added within 7 days of MC35 being added to system.

MC35 10L NON-DRAIN CLEANER.
